Honors Biology Application Please Return to Mr. Medler Room 106 Due February 19th

Honors Biology is an intensive study of the diversity of life. We will focus on organic chemistry, cells, genetics, evolution, organism structure and function and ecology. In this course students will be required to participate in labs to support their learning, organism dissections and will be required to complete a project for each term. This class is a high school class so you will be expected to work hard, study, be willing to listen and learn at a high school level. Typically if you take this class in 9th grade you will be taking chemistry and physics your sophomore and junior years.

Name of Applicant:
B + or better for all terms of 8 th grade science
